

WASHROOM

VECTAIR
AUTO CONTROL™
Faucet

*“Germ Free, Touch Less
Control Faucet”*

Vectair automatic sensor faucets are easy to install and unlike other sensor faucet manufacturers that have different model faucets for battery, plug-in, and hardwire installation, Vectair has combined the technology of three into one. The family of E-Z faucets utilize 6 VDC power so the same model faucet can be installed in your choice of supplied power. From standard lavatory to gooseneck design, you have the

Undermount Electronics & Solenoid

flexibility to choose either battery (three-year life) or unlimited power supplied by plug-in or hardware. And, the plug-in and hardware models come standard with a battery back-up feature.

Everything about the TLC™ Faucet is smart. Sophisticated sensor technology, elegant design, easy installation and simple service. No wonder it's the smartest choice for your touchless washroom

HANDS FREE

VECTAIR AUTO CONTROL™
