VECTAIR AIROMA™

automatic odor control system

*“Freshness -
through fragrance
and technology”*

The Airoma™ patented I.P.E.* system provides flexible programming options allowing costs to be fixed while matching fragrance delivery and odor control to location conditions. The I.P.E.* feature enables programmable fragrance intensity, by allowing users to program up to 3 periods per day of enhanced fragrance delivery to suit location requirements. Higher fragrance levels can be selected at known busy periods. A countdown clock indicates time until next spray and confirms operation of unit.
