

Salt Lake City Airport Case Study

SensaMist® S100 Scent Diffuser

At a glance

The first terminal and airport administration building at Salt Lake City Airport was built in 1933. It is a civil-military airport located about 4 miles west of Downtown Salt Lake City, Utah, in the United States. The airport is the closest commercial airport for more than 2.5 million people and is within a 30-minute drive of nearly 1.3 million jobs.

What they said:

"We chose the SensaMist® S100 unit because of its sleek design, power option, pricing, the fact that it was non-aerosol, and the system offered customizable fragrance."

SCENT CHALLENGES

SLC were using a fan unit with a wafer like air freshener that just wasn't hitting the spot in all their terminal restrooms. They were looking for a system that had both style and impact options at an affordable price.

SOLUTIONS

Through our local distributor, we suggested using SensaMist® S100 for its modern design, power over battery option and because it was non-aerosol and fragrances were VOC exempt - an important environmental feature when selecting fragrance options for busy public spaces.

BENEFITS

1

Sleek design

The SensaMist® Scent Diffuser utilizes advanced atomizer technology to create a fine mist of fragrance. The dispenser is designed with a futuristic look.

2

Power option

Powered, virtually silent operation, providing 6W of power to the device. No batteries are needed and no waste disposal issues. The power maximizes coverage performance and concentration.

3

Malodor counteractant

Along with being VOC exempt, all fragrances contain Airadicate® malodor counteractant & odor neutralizer to help stop bad odors.

SensaMist® S100 Scent Diffuser

THE MAGIC OF SCENT MADE SIMPLE.

The SensaMist® S100 Wall Powered Scent Diffuser provides an enhanced visitor experience in a number of locations with a non-aerosol fragrance delivery system.

Using advanced atomizer technology and unique fragrance oils, each fragrance can be programmed to last according to location preferences.

Along with airports, the S100 is an ideal aircare solution for hotels, casinos, gyms, homes, offices, retail spaces and hospitality venues.
